BETTER BLUEPRINTS

for smaller environmental footprints

We've all got plans for our children... and the desire to give them the very best. After all, they deserve nothing less. But what kind of planet are we leaving for them... and how healthy a living environment?

At Reid's Heritage Homes, we're committed to building sustainable, energy-efficient homes. So we've taken a long, hard look at the floorplans we offer in our communities across the province, and we've made all those blueprints "green" by incorporating the most advanced and environmentally friendly features.

From R-2000 Homes to ENERGY STAR® qualified homes to our new LEED high performance home, Reid's Heritage Homes has been in the forefront of new technology and systems to help conserve our resources and protect our planet.

And with our EnviroWise™ program in place, we plan on staying on that leading edge for many years to come. All for the benefit of our customers... their children... and their children's children.

As part of our on-going commitment to promote better building practices and raise environmental awareness, Reid's Heritage Homes and Owens Corning proudly present these unique and informative model homes displaying our energy efficient features.

There will be a total of four ENERGY STAR® High Performance model homes built across southwestern Ontario. The Southwind II was the first to open in Oakridge Crossing, London. This fall, two other models will follow at the Highlands at Hunter Ridge in Kincardine, and Georgian Meadows in Collingwood. Stay tuned for the fourth opening to take place this winter at Talbot Village in London.

KINCARDINE

The KIMBERLEY III

Located at 599 Hunter St.

OPENING
SATURDAY, SEPT. 29TH!

THE HIGHLANDS
AT HUNTER RIDGE

In addition to 2-storey and bungalow designs, the Highlands at Hunter Ridge offers picturesque surroundings and an array of first-class outdoor activities near by.

CALL 519-396-4848

GREEN FACT: Water heating is the second highest energy cost in a typical home. The Drain Water Heat Recovery System featured in this model recaptures heat from the waste water going down the drain and uses it to preheat incoming cold water. DWHR supplements your water heater to increase your available supply of hot water and can reduce water heating costs by as much as 25-40%.

GREEN FACT: Reports indicate that due to hard to control contaminants, indoor air can be up to 7 times worse than outdoor air. This model features a High Performance Air Filtration System that removes up to 95% of small particles and is effective in filtering 90% of micro-organisms and bioaerosols to keep your family breathing easily with excellent indoor air quality.

SHERWOOD HOMES PRESENTS...

COLLINGWOOD

The FRASER

Located at Lot 5 Marina Crescent

OPENING
SATURDAY, SEPT. 29TH!

Georgian Meadows by Sherwood Homes Ltd. boasts a prime in-town location, set at the edge of the country with Blue Mountain and other outdoor attractions only moments away.

The WEBSTER

Located at 162 Goodwin Drive

NOW OPEN!

Leadership in Energy & Environmental Design (LEED) is an internationally recognized standard that promotes the design and construction of high performance green homes. That means it includes features promoting superior energy and water efficiency... healthier indoor air quality... more effective resource use... and lower overall environmental impact.

CALL 519-766-9838

GREEN FACT: This model features a basement finishing system that incorporates a thermally superior R22 wall and full under slab insulation in addition to a leak management application. These components combined, ensure optimum comfort and drastically reduce moisture and water issues typically associated with basements. Huge energy cost savings are just an added bonus!

GREEN FACT: This model features a **Geoexchange HVAC Stream System** which uses free, renewable heat energy from the sun and below ground to power a home's heating/cooling and domestic hot water needs. Energy consumption can be reduced by up to 79% compared to traditional, natural gas furnaces and hot water heaters.
